

Curriculum Vitae

Daniel P Broadbent

I am 25 years old, I have worked with many clients building various websites and projects, including designing/developing projects, securing websites and maintaining projects over the past 12 years (8 years commercially). I enjoy back-end development over full-stack / front end development.

Phone Availability: Mon-Fri: 2-3pm, or after 6:00pm or Sat-Sun: All day

ADDRESS

7 Greenford Road,
Clacton-on-Sea,
Essex,
CO15 2AZ

EDUCATION

GCSE's:

Maths:	Pass
English:	Pass
Graphic Designs:	Pass
ICT:	Distinction
Graphic Products:	Pass

A Level's (AS)

ICT Double Award	Distinction
IT Computing:	Pass

CONTACT ME

Email Address:

me@dannybroadbent.com

Phone Numbers:

074 9683 2115
01255 427 828

SALARY EXPECTATIONS

Looking for: £65,000+

WORKPLACE SKILLS

Programming:	PHP (OOP, Design Patterns), PHP API's: HTTP API; REST API; Soap Client API, JavaScript (Inc aJax; jQuery), HTML (With W3C Standards and HTML5), DHTML, XHTML, CSS (Inc CSS 3), XML, Web Sockets (Using Socket.IO), MVC's: Bespoke (own built), Codelgniter, Laravel (not much involvement)
Online/Server Software:	cPanel (MYSQL - <i>phpMyAdmin</i> , DNS, Cron Jobs and loads of other features), WHM, WHMCS, Linux & Apache, Plesk
CMS Systems:	Wordpress, Drupal, TinyCMS (Bespoke, Own CMS)
eCommerce:	Open Cart, Magento, Woo Commerce and osCommerce
Main Software:	Adobe Collection (Dreamweaver, Fireworks, Photoshop, Illustrator, In Design), Eclipse, Netbeans, jEdit, Putty, FileZilla, Microsoft Office, Open Office, MySQL Workbench / HeidiSQL / Sequel Pro, PHP Storm, Notepad++ and more
Learning:	Go, bits of Java, and more on Web Sockets, Magento and PHPUnit.
Pen Testing:	Zap and Metasploit
Unit Testing:	PHPUnit (learning)
Desktop OS:	Windows, Mac, Ubuntu (mostly Mac now)
Server OS:	Windows Server, Ubuntu, CentOS and Debian (mostly Debian 8)

WORK HISTORY

 <p>Leigh-on-Sea Essex</p> <p>Started: 2015 (mid)</p> <p><i>Storm Creative</i></p>	<p>Senior Lead Back-end Developer (PHP) (Current)</p> <p>Task: Developing client websites, creating API feeds for Rightmove, Zoopla, and bespoke systems, built bespoke in-house MVC framework (Pen tested by Rapid7), built in-house systems (booking hub, job system, blog cms), Therapy for You (NHS project) won an Award (see page 5).</p> <p>Achieved: Gathered more experience with dealing with clients needs and requirements, worked on in-house bespoke projects.</p> <p>Websites Built: www.therapyforyou.co.uk (NHS), www.o3insurance.com, www.griffin-financial.co.uk, www.ecl-people.co.uk, www.royalsshoppingcentre.co.uk</p>
 <p>Brightlingsea Essex</p> <p>Started: 2014 (end)</p> <p><i>Voodoo Creative</i></p>	<p>Senior PHP Developer</p> <p>Task: Developing client websites, creating API feeds for products and category imports, course listings and widgets / plugins.</p> <p>Achieved: Gathered more experience with dealing with clients needs and requirements</p> <p>Websites Built: www.logiblocs.com, www.suffolkmeattraders.co.uk, www.hundredriver.co.uk, www.breen-smartbags.com, www.healthy1.co.uk</p>
 <p>Bishop's Stortford Hertfordshire</p> <p>Started: 2011 Ended: 2014</p> <p><i>Armour Home Electronics</i></p>	<p>Senior PHP Developer</p> <p>Task: Working on various projects and well known brands (QED, Q Acoustics, Grado, Systemline, Q-TV Speakers, Myryad, Milty, Goldring, Armour Home, etc).</p> <p>Achieved: I have learnt more skills in this position (PHP, aJax/jQuery, XML, JSON, Linux, Nginx, Varnish Cache), I have built my own CMS system (developed using PHP, jQuery, Javascript, XML, HTML, CSS) to run the companies websites off and to enable brand manager access to the website to manage to content on their site.</p> <p>Websites Built: www.qed.co.uk, www.grado.co.uk, www.systemline.co.uk, www.alphasondesigns.com, www.myryad.co.uk, www.armourhome.co.uk</p>
 <p>Watford Hertfordshire</p> <p>Started: 2010 Ended: 2011</p> <p><i>Automotive Innovations</i></p>	<p>Software Developer</p> <p>Task: Working on two projects one called Mentor.Net and another one being Groupsite (For all of Palmers Motor Company websites), designing, it technician, helpdesk support.</p> <p>Achieved: Knowledge (Learned more about PHP, Linux, Adobe Fireworks, JavaScript, Ajax), built and designed new modules within the Mentor.Net and Groupsite projects. Talking and dealing with customers.</p> <p>Systems: Mentor.Net, Mentor.Web</p>
<p>Wholesale Packaging</p> <p>Borehamwood Hertfordshire</p> <p>Started: 2008 Ended: 2010</p> <p><i>Wholesale Packaging</i></p>	<p>Junior Website Developer</p> <p>Task: Designing, creating and building a website, maintaining the website and updating products and information on the website.</p> <p>Achieved: Learned more about JavaScript, DHTML, PHP, MYSQL.</p> <p>Websites Built: www.wholesalepackaging.co.uk, www.packagingwholesale.co.uk</p>

Managing Director

Task: Designing, creating and building the myWeb website and designing, developing and maintaining client websites and projects.

Achieved: Management experience, knowledge, programming (XHTML, W3C, PHP, Cron Jobs, MYSQL, AJAX, API, Nginx, Varnish, JSON). Built a Chrome Webstore app (sFTP Client).

Websites Built: www.mywebltd.com, www.kiyan.org, www.sftpclient.co.uk, www.asfarmservices.co.uk, www.beauty-rooms.co.uk, www.evergreen.co.uk, www.hertslandscapes.co.uk, www.hertfordshiregardeners.co.uk, www.elstreestorage.co.uk, www.layerpads.co.uk, www.cdmcars.com

SKILLS

- I am also good at researching information effectively to use into a solution/problem plus general use.
- I have good communication, customer and problem solving skills.
- I am able to do Penetration Testing on websites (keeping websites/applications secure).
- I enjoy optimising websites/applications for best performance (browser/server caching, CDN's).
- I am able to setup and maintain a dedicated or virtual private server (including cloud servers).
- I have not long gone into PHP Unit testing to increase my knowledge on testing frameworks.

SUMMARY

As a Senior Lead Back-end Developer, I use my coding expertise and experience to build solid, secure website infrastructures that help our clients achieve their business goals online.

My extensive knowledge of the industry's leading programming languages allows me to build the best framework for each individual client, based on their objectives and requirements. I work with HTML, CSS, JavaScript, PHP, aJax, XML, JSON, jQuery and NodeJS on a daily basis and always choose the most cost-effective, efficient languages, servers, database systems and website infrastructures (including CDN's) for every project I oversee.

Working closely with Front-end Developers and Digital Designers has given me an appreciation of digital design aesthetics, and I relish the challenge of integrating back-end data storage and delivery with front-end design and usability.

Database and back-end planning is an important part of any new website build, and I play a key role throughout the duration of our digital projects, from the initial briefing meetings right through to the completion and 'go live' phases. At every stage of each project I am on hand to provide feedback and guidance to both colleagues and clients, helping to ensure that the design and build of each site is completed on time and on budget.

I love the logic behind coding and enjoy helping clients create enjoyable, user-friendly experiences for their website users. I am also naturally inquisitive when it comes to all things digital, which helps me keep track of all new industry trends and developments and ensures that I am always equipped to offer clients innovative solutions to their digital challenges.

I am a professional when it comes to programming as I know a lot of programming languages of which was self taught. Languages I know are shown in the Web Development Skills section. I am always learning new things and increasing my knowledge. I have built many websites while developing my new skills, some of the websites I have built are (as shown in my Work Experience):

A&S Farm Services	www.asfarmservices.co.uk
Wholesale Packaging	www.wholesalepackaging.co.uk
The Beauty Room	www.beauty-rooms.co.uk
The Kiyan Prince Foundation	www.kiyan.org
Layer Pads	www.layerpads.co.uk
Elstree Storage	www.elstreestorage.co.uk
Logiblocs	www.logiblocs.com
Healthy1	www.healthy1.co.uk
Breen Smart Bags	www.breen-smartbags.com
QED	www.qed.co.uk
Grado Headphones	www.grado.co.uk
Armour Home	www.armourhome.co.uk
Alphason Designs	www.alphasondesigns.com
myWeb Ltd (Own business)	www.mywebltd.com
Therapy for You (NHS)	www.therapyforyou.co.uk
o3 Insurance	www.o3insurance.com
Royals Shopping Centre	www.royalsshoppingcentre.co.uk

Some of these website were built using Wordpress, some with my CMS system (aka TinyCMS) I built and some websites use plain HTML/CSS and Javascript on a PHP back-end platform.

I have also built my own sFTP Client for Google Chrome:

sFTP Client

sFTP Client is a Google Chrome Webstore application. sFTP Client can be used to connect to your FTP/SSH server, transfer/edit files, change file permissions and much more.

Unfortunately I don't have time to commit all my time into this project so there's loads of room for improvement on this app but has made an amazing £20,000 income in 2 years.

Visit: [Google Chrome Webstore](https://chrome.google.com/webstore/detail/sftp-client)

I enjoy logging data, seeing the end results, finding exploits / vulnerabilities, consumer testing, caching and optimisation on pages for best performance on website and server, researching/learning new skills to get tasks done, playing around with animations and design features (parallax/responsive design), trying new techniques/languages to challenge my knowledge and increase my skills.
